

Dr Antoine Marçais

Centre International de Recherche en Infectiologie (CIRI) – Inserm U1111 - Lyon

Antoine Marçais is a tenured researcher at Inserm with a PhD in Immunology on memory CD8 T cells (2006). He completed two post-doctoral fellowships: in London at the Imperial College in the team of Matthias Merkenschlager on miRNAs and then in Lyon at the CIRI in the team of Thierry Walzer. He then joined Inserm at the CIRI in 2016. Since then, he leads a group in Thierry Walzer's team devoted to the study of NK cell metabolism, its regulation by the kinase mTOR and its impact on NK cell effector functions.
