

Emmanuel DONNADIEU (Institut Cochin- Inserm, CNRS, Université de Paris). Working in the field of immunology for more than 20 years, Dr. Donnadiou has accumulated a complete experience in cell signaling and cellular imaging related to T-cell physiology. He is notably well-recognized in the field of T-cell migration and the role played by external factors controlling this process. His current projects aim at targeting the tumor microenvironment to improve CAR T cell therapy. He has been a group leader since 2014.
