

Rahul Roychoudhuri is a Associate Professor at the University of Cambridge where he is Theme Lead in Infection and Immunity.

Rahul studied Clinical Medicine and Natural Sciences at the University of Cambridge. Rahul undertook his Ph.D. in Gary Nabel's laboratory at the US National Institutes of Health and a postdoctoral fellowship at Nicholas Restifo's laboratory at the US National Cancer Institute (NCI). His research has made fundamental contributions to our understanding of immune regulation, tumour immunosuppression, immunological memory and gene regulation. His recent work aims to understand and enhance maintenance of T cell responses in a variety of therapeutic contexts.
