

Sophie Caillat-Zucman is Professor of Immunology at University of Paris, Head of the Immunology and Histocompatibility Laboratory at Saint-Louis Hospital, and director of a research team at the Saint-Louis Research Institute. She leads projects at the interface between basic and clinical research in transplant recipients and patients receiving CAR-T cells, such as the development of allogeneic CAR-MAIT cells, and the identification of early biomarkers predictive of response to CAR-T cell therapy.
